

Webex Devices

Cisco TechClub

Jaroslav Martan, jmartan@cisco.com

Agenda

- Webex Board Pro – first of next-generation devices
- RoomOS 11 – new user experience

What does the future of collaboration look like?

“Will my team still be able to brainstorm and collaborate as they did on laptop-to-laptop meetings now that part of the team will be in a conference room?”

Common digital collaboration challenges

Distributed teams in different locations using a variety of devices

Capture and easy access to ideas, content and outputs

Lack of context and integration with common tools and apps

Webex Board Pro

All-in-one room collaboration
for hybrid teamwork

Webex Board Pro

Video-first visual
collaboration for any
meeting room,
designed for hybrid
teams

Enabling the modern workplace

Join any meeting

- Initiate audio (phone call) or video conferencing
- Easily join any meeting, on Webex or on third-party solutions
- Start a meeting with one button to push – the Board Pro detects you while entering the meeting room

Collaborate & co-create

- Access your preferred visual collaboration tools
- Digitally whiteboard, annotate, draw and use stickies – with your finger or magnetic pens
- Co-create and brainstorm on an infinite canvas
- Extend your laptop into a touch screen via touch redirect
- Save and share your work

Present & innovate

- Share content wirelessly
- Use two active pens simultaneously
- Continue ideating from other Webex-enabled devices
- Connect with peripherals and external screens for larger spaces

Designed for hybrid teamwork

Intelligent, premium meetings

Purpose-built design

Visual collaboration

Web apps & interoperability

Simplified control & management

Room & device integrations

Two
available
sizes to
adapt to any
meeting
space

Webex Board Pro 55

Best for huddle spaces, small-to-medium meeting rooms

Webex Board Pro 75

Optimal for mid-sized conference rooms and co-creation spaces

Powering the future of hybrid teamwork

Directly join your third party meetings

- Powered by cloud video interoperability, you can easily join with One Button to Push or direct dial into your Microsoft Teams and Zoom meetings using Meeting ID
- No need to reboot systems when switching between meeting vendors
- Simple wireless pairing and sharing while enabling multi-screen experience with full HD video
- Consistent user interface and design identity across devices encourages adoption

Join any meeting with USB-C Passthrough

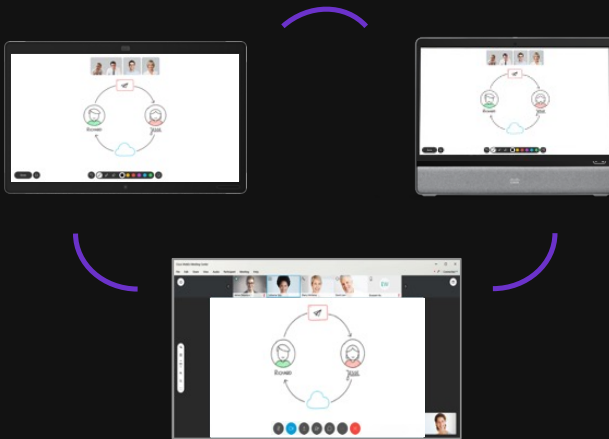

- Touch redirect: join any meeting from your laptop via USB-C cable to use our cameras, screen, microphones and speakers
- Supports intelligent video with best overview and people count
- Supports audio fencing using built in microphone and delivers premium sound
- Optional 9m cable for meeting rooms

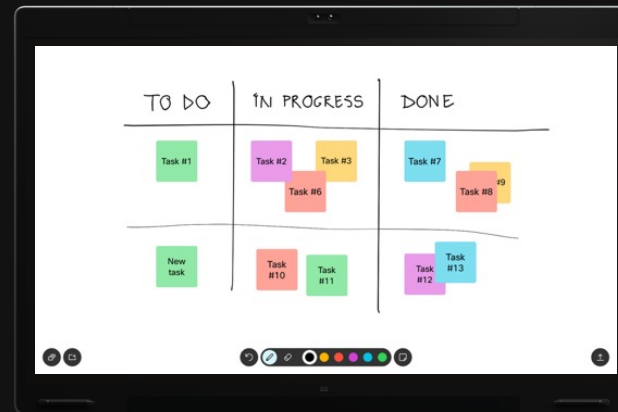

Real-time digital whiteboarding across Webex devices and the Webex App

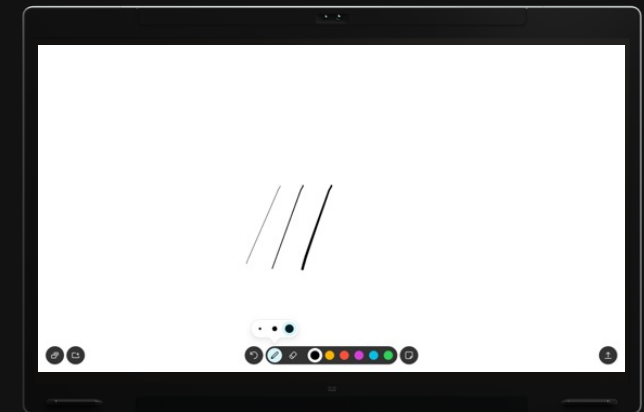

Co-creation and ideation tools for team productivity

Co-create on the **same digital whiteboard** across Webex devices and Webex App-enabled devices

Two active pens for simultaneous ideation

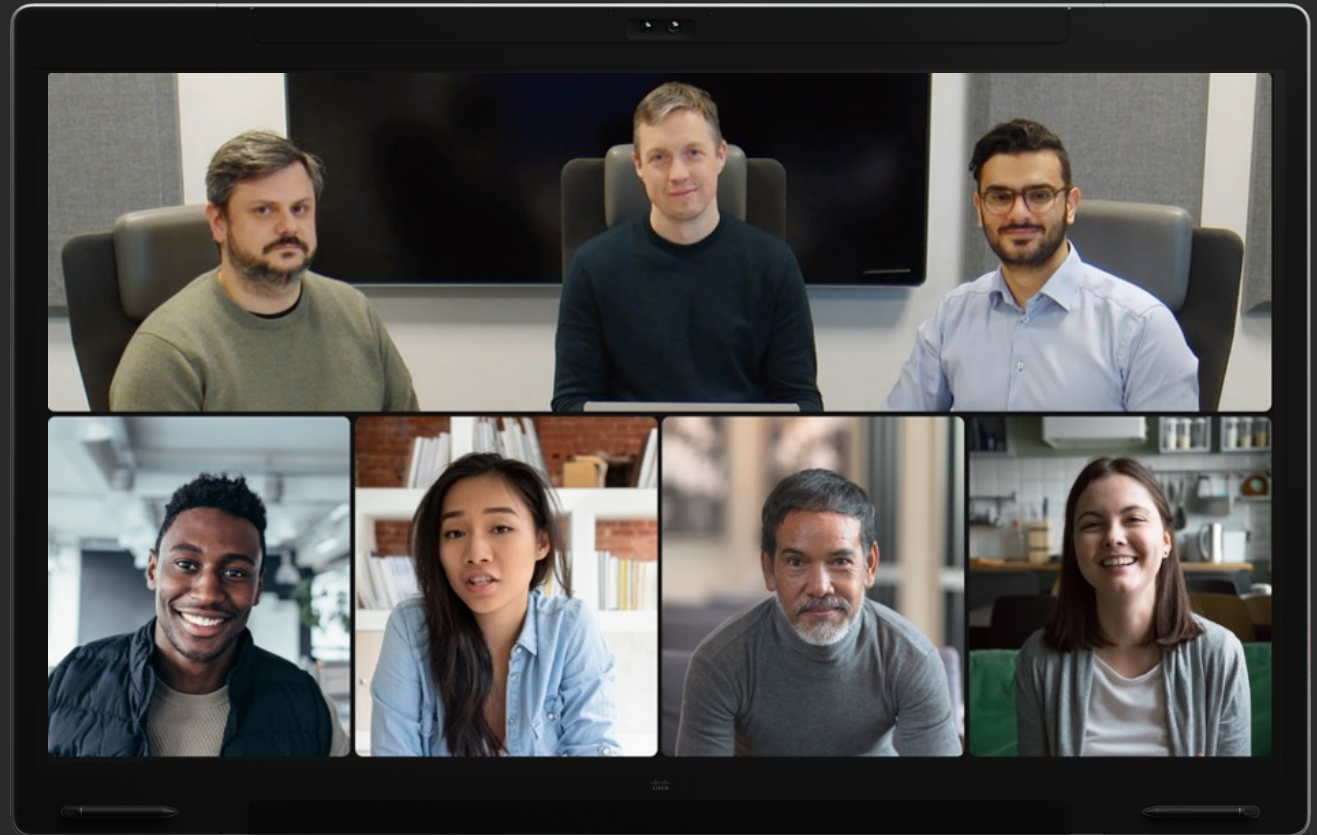

Annotate and draw on shared content or an infinite canvas

Webex

Unified management and analytics

- Gain workspace insights and simplify device management like a pro with Webex Control Hub
- Use a single pane of glass for management, deployment, troubleshooting and analytics to provide IT with insights to help guide the business
- Optimize workspaces while reassuring people's sense of safety and health
- Get real-time trends and business insight into user adoption, engagement, meeting quality of service
- Manage and monitor utilization and performance of device resources in real-time – tailored to your business policy
- Control all of your Webex devices along with office environmental controls at scale

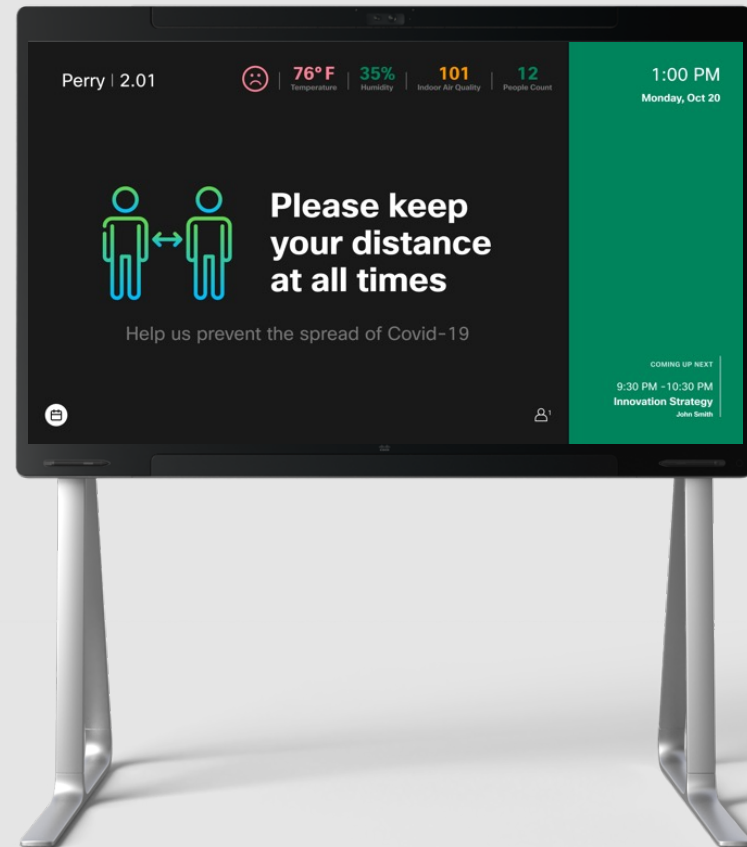

Cloud-first, not cloud only

- Flexible deployment options: cloud-first, not cloud only
- Protect your investment leveraging existing on-premises infrastructure
- Webex Edge for Devices: a flexible and affordable transition to the cloud
- Simplify deployment complexity and management costs
- Deploy on-premises or as a hybrid solution

Digital
signage:

experience
with on—
demand
content

webex

Webex Board Pro Summary

- Any meeting
 - Native support for MS Teams, Google Meet, Zoom
 - USB pass-through for any other
- Any user scenario
 - presentation
 - whiteboard
 - video call
 - presenter track

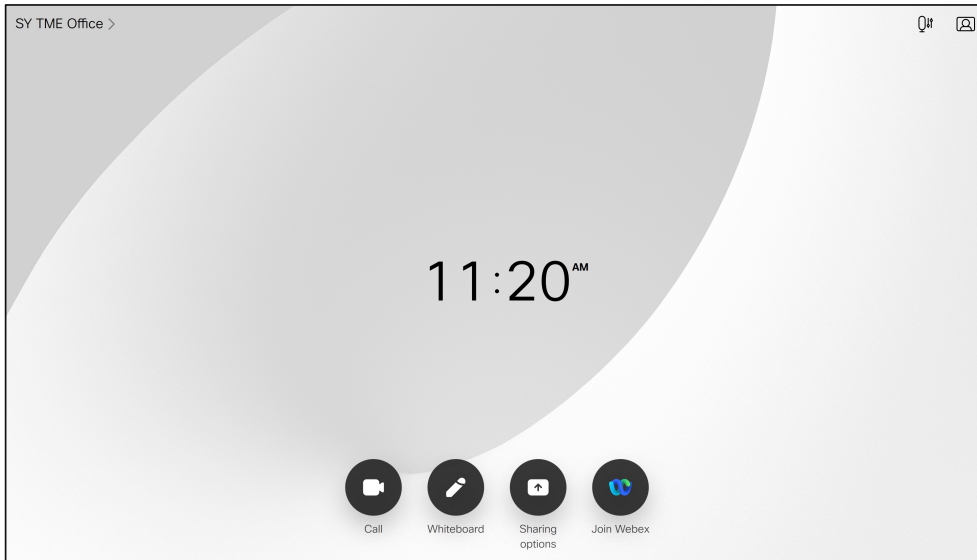

RoomOS 11

RoomOS 11

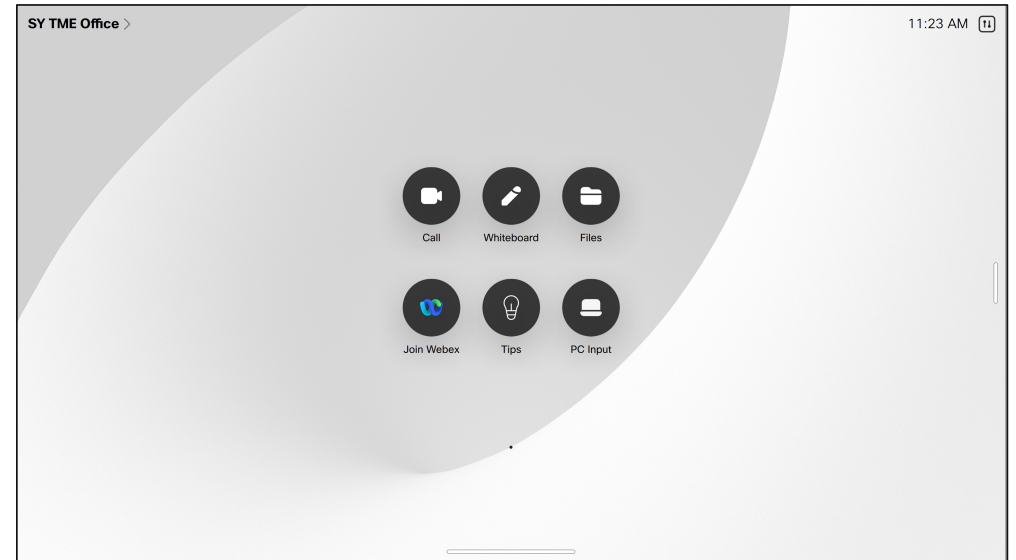

- Available for Webex Desk Series and Webex Board Series
 - Opt-in/opt-out
- Support for Room Series devices to be released later
- Support for Webex Edge for Devices with Cloud Upgrade Mode to be released later (possibly released in Beta – to be confirmed)
- Software release will still show RoomOS 10.x.x.x
 - Will move to RoomOS 11 once Room systems added.

RoomOS 10 vs RoomOS 11

RoomOS 10

RoomOS 11

Home screen

Easy access to various apps

Task switcher

Provides easy access to open apps

Files button

View of whiteboards created locally. Additional files available when device is bound to a space.

If Web Apps are installed that give file access (such as OneDrive), you can access the files from the Files app

Control panel

Swipe to the left to open control panel. Here you will find settings related to the device.

Screens subject to change

Task switcher

Swipe up from the bottom of the screen to get to home screen or open apps

Closing apps

To close a full screen app (such as whiteboard), swipe up on the preview image shown in task switcher to close

Screens subject to change

View connected laptop

Laptop screen will appear in task switcher. To view (if not shown), tap on preview in task switcher

Whiteboards

All whiteboards created in one session appear as separate open apps

Call controls

Tap screen to expose controls.

Task switcher

Swipe up from the bottom of the screen and select the preview of your PC input to keep on working on your PC

Screens subject to change

Control panel

Swipe from the right side of the screen to expose the panel. Selfview button shows camera controls and virtual background options

Share

Tapping on share will open dialogue box offering share options available

Control Hub

Action will be required in Control Hub

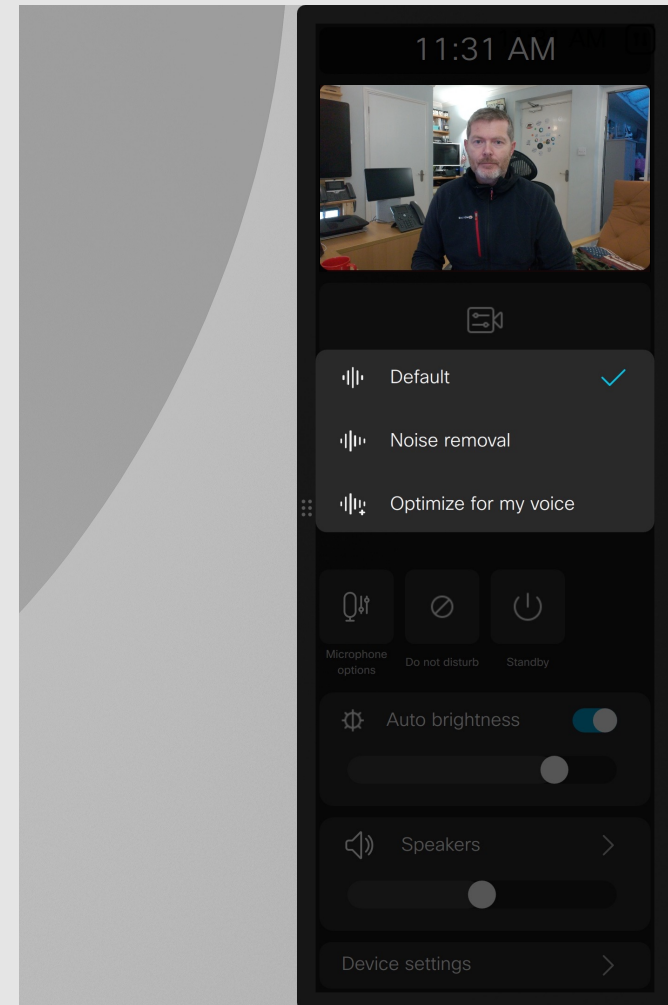

- Full Admin or Device Admin will need to 'opt-in' to have the experience enabled on the supported devices.
- This is a global setting for the org
- Webex Board Series and Desk Series (excluding DX) will update immediately unless the device is in a call
- End user will have the ability to turn the experience off and revert to the previous UI
 - Swipe in on the right side of the screen to expose the control panel and then Device settings>New RoomOS Experience and turn off.

The screenshot shows the 'Devices' settings page in Cisco Control Hub. The 'RoomOS 11 UI Experience' toggle is turned on, with a 'New' badge. Below the toggle, there is a description of the new UI experience, requirements (supported for Desk and Board Series, excluding DX series, and RoomOS January software release or newer), and a note that enabling it changes the default interface. Two side-by-side images illustrate the transition from the old UI to the new one. A 'More about RoomOS 11 UI Experience' link is at the bottom.

Screens subject to change

Optimize for my voice

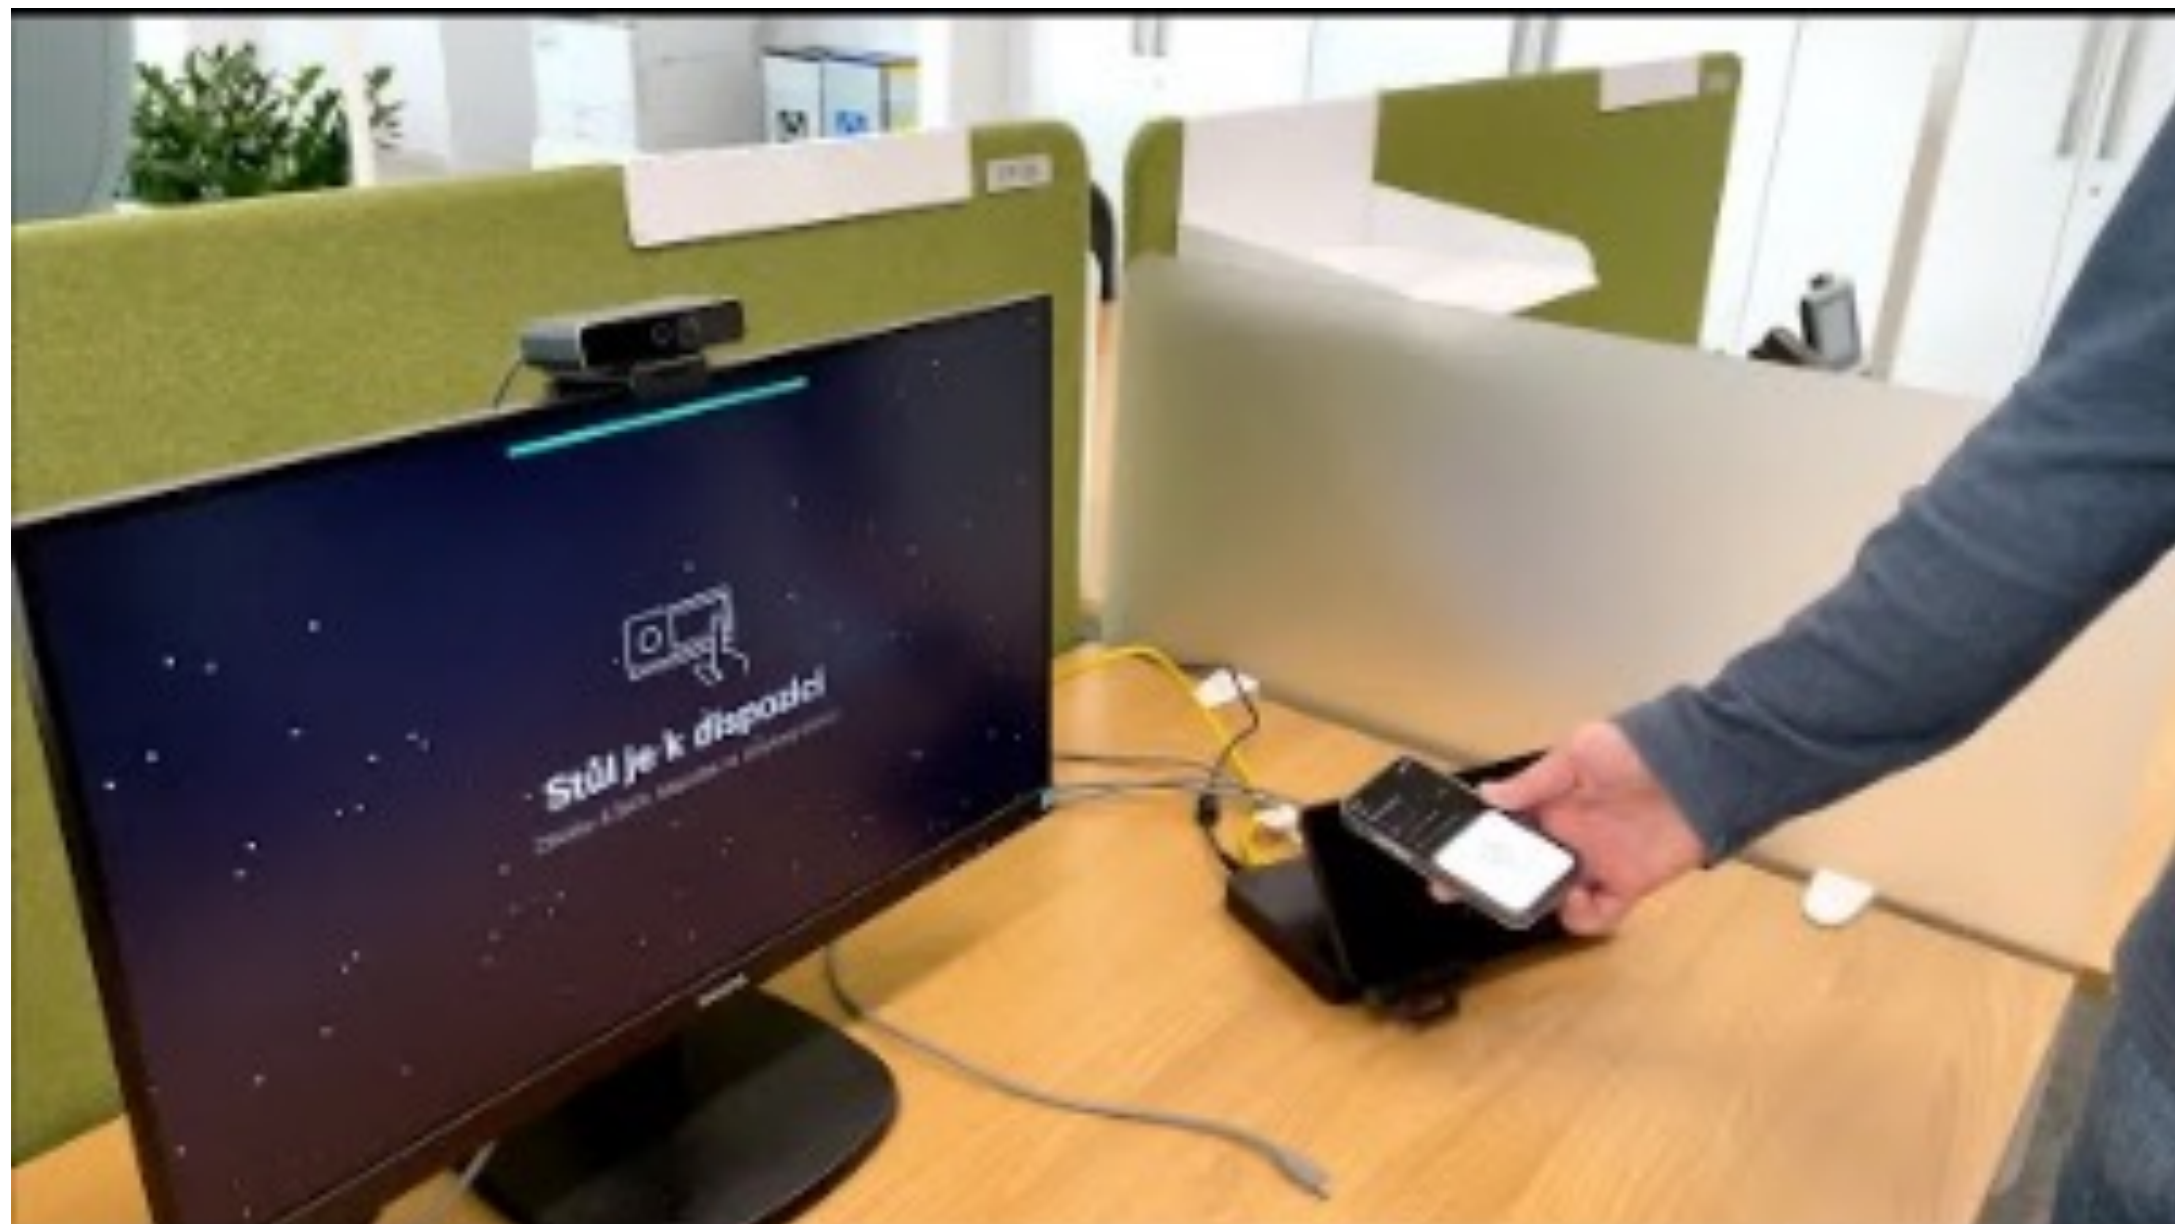

- Noise removal powered by BabbleLabs removes background noise but does not filter out additional voices.
- Optimize for my voice will also filter out the additional voices and will focus on the closest speaker
- Supported on
 - Webex Desk Series
 - Webex Board Series
- Supported with RoomOS 11

Pairing via USB-C

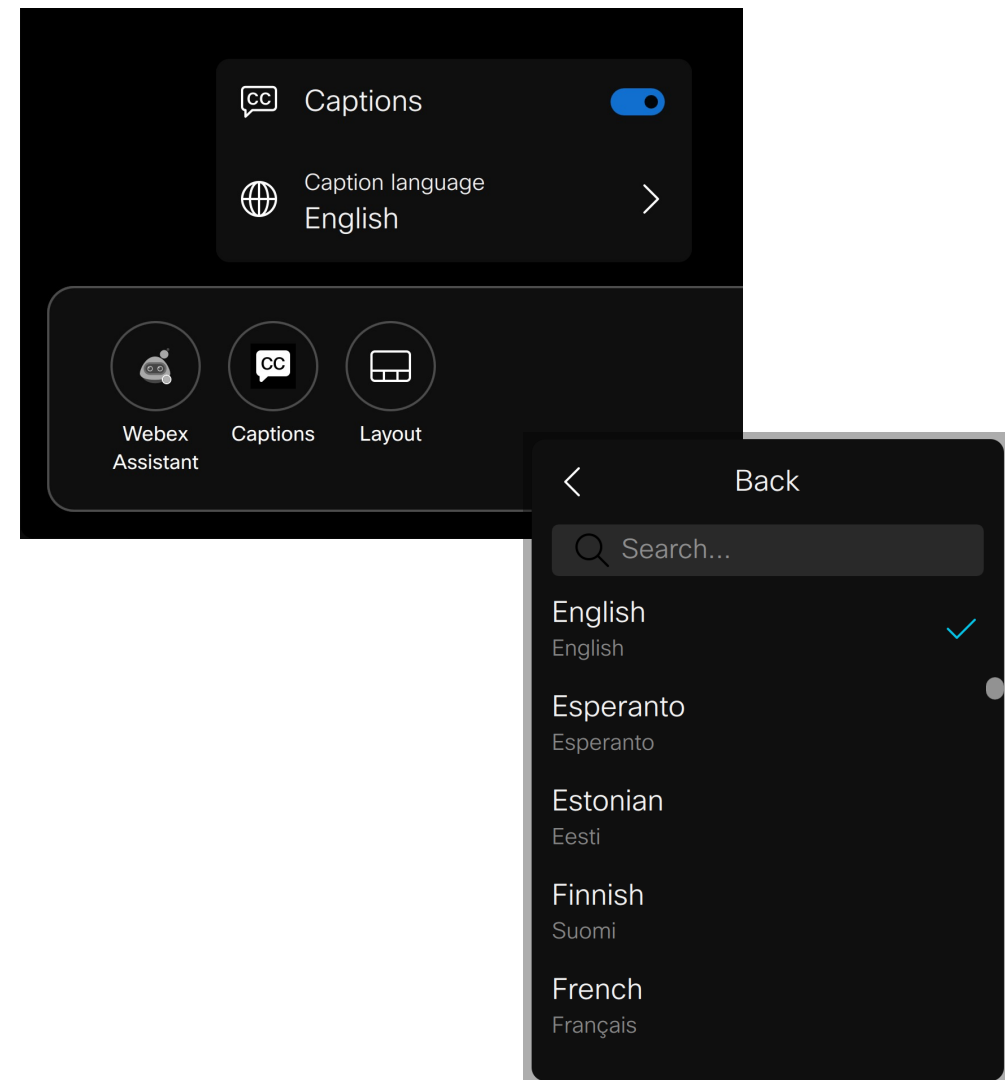

- Available on the entire Desk Series
 - Desk Pro, Desk LE, Desk, Desk Mini, and Desk Hub
 - Considering other devices
- Reduce ultrasound noise in open environments
 - If users are already connecting to the device with a wire, no need for ultrasound
- Supported on Webex-registered devices only
 - Cloud connectivity required to fetch tokens
- USB-C (Device-side) to USB-A (PC-side) supported
 - No support for USB-A device-side connections

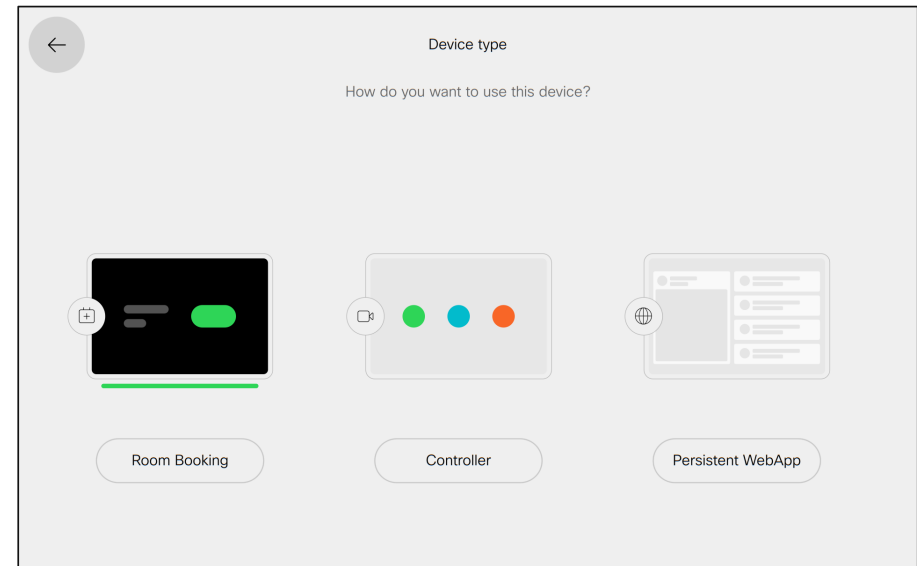

Closed Captioning and Real-time Translation

- Help meet accessibility requirements for devices
- Support for current portfolio (RoomOS 11)
 - Webex-registered devices only
 - Requires Webex Assistant subscription
 - Host or cohost enabled Webex Assistant in the meeting
 - Enabled per user on their device
- Enabling Closed Captioning limits grid size to 3x3
- Support for all Webex languages
 - [https://help.webex.com/en-US/article/7dzhht/Real-time-translation-in-Webex-Meetings-and-Webex-Events-\(new\)](https://help.webex.com/en-US/article/7dzhht/Real-time-translation-in-Webex-Meetings-and-Webex-Events-(new))

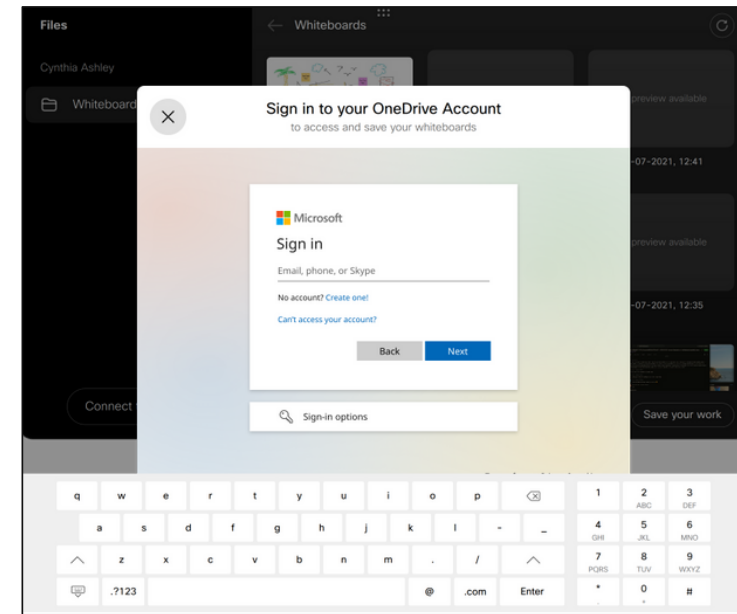

Persistent WebApps on Room Navigator

- Provide a full screen web view to deploy apps to Webex Room Navigators
 - Replace the native RoomOS UI with a WebApp
 - I.E. Appspace, DNA Spaces, other booking tools
 - Provisioned through Control Hub
 - Allows for control of the LED on wall-mounted units
- Adds flexibility for customers to keep or enhance their existing space management and/or signage solutions
 - Added value from Webex Room Navigator
- Only supported on remotely/IP-paired Navigators
 - No support from behind codec/device

ECM Storage for Whiteboards Outside of Webex – One Drive

- Whiteboards can now be saved to One Drive
- Login with your One Drive credentials on the device
- Open existing whiteboards in your One Drive
- Import local whiteboards into One Drive for sharing
- PDF whiteboards can also be opened again and edited as whiteboards
- Other ECMs are on the roadmap

RoomOS 11 Summary

- Multi-tasking user interface
- Join any meeting – Webex, MS Teams, Google Meet, Zoom, call SIP
- Hot desking
- Subtitles + translation
- OneDrive integration
